

Attendee Testimonials

"It appears that this [technique] is well worth pursuing to see if it works in our community. We'll look at the environmental design of the roads and the signage... Anything that can be done to reduce crashes is worth looking into."

— **Police Chief Douglas Fuchs**
Redding, Connecticut

"The leadership of the State Highway Safety Office in this process is imperative. In Massachusetts, we have hosted two successful speed management workshops, drawing on our contacts in the various disciplines to solidify a joint approach."

— **Caroline Hymoff**
Director of the Massachusetts
Governor's Highway Safety Bureau

Get Started Today!

Speed Management workshops are conducted at the State and local level by U.S. DOT-endorsed instructors. Training and material are free of charge. To learn more and find out how to sign up for a workshop near you:

CONTACT the National Highway Traffic Safety Administration Regional Office in your area. To find your local office, visit www.nhtsa.gov/nhtsa/whatis/regions.

OR

CALL the NHTSA Enforcement & Justice Services Division at 202-366-4295.

SPEEDING

Stop speeding before it stops you

The U.S. DOT Speed Management Workshop was developed by the following DOT agencies: the National Highway Traffic Safety Administration, the Federal Highway Administration, and the Federal Motor Carrier Safety Administration.

U.S. Department of Transportation
National Highway Traffic Safety
Administration

SPEEDING

Speed Management Workshop

...Contributes to 30% of fatal vehicle crashes.

...Costs taxpayers \$40 billion a year.

*Isn't it time you took control
of your roads?*

You're Invited

WHAT

2-Day Speed Management Workshop

Sponsored by the U.S. DOT Speed Management Team

WHO

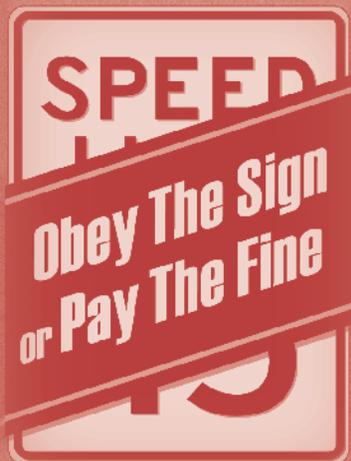

Local policy makers, traffic safety engineers, law enforcement, prosecutors, judges, and highway safety advocates.

WHERE

Workshops will be conducted at locations across the country.

WHY

Get the right people to the table to design and implement an effective speed management program.

Get a Grip on Speed at the U.S. DOT Speed Management Workshop

A Comprehensive Approach

Speed management is a national and far-reaching problem that is best solved through collaborative and comprehensive efforts at all levels of government. However, from road design to enforcement the ability to implement policies designed to mitigate speed-related injuries and fatalities rests largely with State and local officials. To help local officials and community safety advocates like you take control of the speeding management problem, the U.S. Department of Transportation is offering speed management training at locations across the country.

In the span of just two days, U.S. DOT Speed Management Workshop attendees will learn how to:

- ▶ **Evaluate crash data** to identify speed-related problem areas;
- ▶ **Review engineering of roadway segments** to determine how to set reasonable speed limits;
- ▶ **Enforce established speed limits** appropriately;
- ▶ **Develop effective public relations and media** campaign strategies; and
- ▶ **Secure collaboration and cooperation** from traffic engineers, law enforcement, public policy makers and the criminal justice system.
